

TELEVEND SERVICES, INC.
INTERACTIVE VOICE & FAX SOLUTIONS

Replacing the Dialer

- Step 1:** Remove the phone line from the third port on the left side of the fax machine.
- Step 2:** Pry off the old dialer which you will find located under the shelf on the rear of the kiosk.
- Step 3:** Attach the new dialer, using the two sided foam tape provided, to somewhere under the shelf on the rear of the kiosk. Then connect the line from "**wall**" on the dialer to the wall jack. Then feed the line from "**phone**" on the dialer through the small hole behind the left side of the fax machine and plug it into the third port on the left side of the fax machine.

Please repackage the old dialer in the postage paid,
pre-addressed yellow padded envelope.

Thank you.
